Description

This house was remodeled to be lived in, not to be sold. And you can see it in the details.

Completely remodeled in December 2024, this 2-bedroom apartment with 71 m² of usable area, on Rua Rosas do Pombal, in Almada, is a home designed to be lived in: functional, bright and with its own identity.

The remodeling sought to make the most of every space while preserving the character of the house. Materials, colors and finishes were carefully chosen, creating welcoming, functional environments with their own identity.

The living room is spacious and very bright, with well-defined space for both living and dining areas. The former balcony was integrated into the living room, increasing the social space and creating a light-filled area by the large windows, currently used as a small indoor garden.

The kitchen was completely renovated with plenty of storage, wooden countertop and an aesthetic that combines classic with contemporary. The second balcony was integrated into this area and transformed into an independent laundry room, allowing appliances and laundry treatment to be kept separate from the main kitchen area.

The apartment has two generously sized bedrooms.

The bathroom was also completely remodeled, with a walk-in shower and a combination of materials and tones that matches the identity of the rest of the apartment.

During the remodeling, double-glazed windows and electric shutters were also installed.
